Third Frontier Research Initiative - FY26/FY27 RFPs - Q&A Spinal Cord Research	
Are the maximums for one year or two years of funding? e.g. for the Commercialization Research Grant, does the maximum request of 750k and a two year limit mean that each year is limited to ~375k (for a total of 750k across the two years) or that each year has a maximum request of 750k for a total of 1.5M over two years?	The maximum/total request for both FYs cannot exceed \$750,000.
Can you clarify if the awards are \$250k/ year for two years, or \$125k/year for two years?	The maximum/total request for both FYs cannot exceed \$250,000.
Are the dollar amounts listed in the RFA total costs (direct + indirect)? Or is it just direct costs only?	The total award amount includes both direct and indirect costs.
Are the dollar amounts for Tier1 (\$250K) and Tier2 (\$750k) for EACH grant year, or total over the entire project period (nominally 12 months with an optional No Cost Extension). The maximum request is the total of both FY and cannot exceed each respective amount.	The maximum request is the total of both FYs and the request cannot exceed each respective amount.
